BLACK RICE HISTORY

During the days of the Ching and Ming dynasties Forbidden Rice (Black Rice) was exclusively reserved for the Emperors to ensure their longevity and good health. Eventually, common people were allowed to eat the Black rice. Since then, it has become a nourishing staple that is reputed to promote long life and good health.

Calories:

100gr/ 64cal (white rice 100gr/ 130cal)

Benefits:

Antioxidants, only black rice contains anthocyanin. Higher in fiber than white rice. The bran hull (outermost layer) of black rice contains one of the highest levels of anthocyanins found in food. Black rice has a deep black color and usually turns deep purple when cooked. Its dark purple color is primarily due to its anthocyanin content, which is higher by weight than that of other colored grains. It has a nutty flavor, and firm texture.
